

About EZLocal

Our Company

EZlocal is a local search marketing company focused on helping small businesses connect with the people who are actively searching online for products and services in their area.

Founded in 2007, we power our work with proprietary technology (2010 Chicago Innovation Awards Finalists) and dedicated account teams that develop and manage custom campaigns helping businesses achieve top local placement on sites like Google, Yahoo! and Bing as well as relevant and high-traffic search directories, social networks, online maps and mobile devices.

As a top-ranked local search directory with over two million indexed pages on Google, our team of local search experts are uniquely qualified to offer expertise beyond typical Local SEO firms.

We offer services for managing local PPC, map listings, social review monitoring, and check-in services. Our work helps enhance online exposure, drive qualified traffic, and increase sales.

Specialties

Local Search Marketing, [Google AdWords Solutions](#), [Map Listing Optimization](#), IYP and Directories Management, Online Reviews Monitoring
